Vintage Midnight
6-5/8" x 79" x 13/16"

About the Collection

The beauty of this Vintage Pine collection is created by the enhancement of the wood by the artisan's traditional oil finishing and aging techniques.

Pine is inherently a soft wood, but properly installed and cared for, it will meet the challenges of the most demanding applications.

Indentations will occur over time and are not considered a manufacturing defect. The minor dents and scratches that will occur from normal living will not distract from the overall appearance of your floor. On the contrary, the floors of this collection will look even more beautiful as they age.

The choice of the beautiful colors paired with the characteristics of the selected wood pieces will satisfy the taste of anyone wanting to create a unique and natural living environment.

Specifications

This collection is comprised of:

- * 8 choices in wide, long antiqued boards. These beautiful solid planks are recommended for nail down installations.
- * 1 item of solid Heartwood. Constructed from the hardest, center part of the tree, this product is offered in narrow, long boards and once again, is for nail down installations.
- * 1 reference of an engineered plank of Reclaimed Heart Pine (generally from timber and beams salvaged from old structures). This floor can be floated or glued down and is your choice if your sub-floors are made of concrete slab.

Warranty

Because the Natural Oil Finish is absorbed INTO the wood and does not lie ON TOP of the wood, there is nothing to wear off. Since the surface of these products is actual wood and does not have a wear layer it is not possible to offer a "Wear Warranty". Proper maintenance in accordance with the instructions provided by USFloors will insure that the floor will remain in aesthetically pleasant condition.

USFloors offers a Lifetime Structural Warranty for the floors in the Bordeaux Pine Collection. Visit us online at www.usfloorsllc.com for more details.
